

Title : Managing the side effects of Risperdal
Consta 25mg
7/10/2023

1. Today was not easy.
I didn't feel well a few times.

In the morning, the pre-patterns symptoms came in, so I literally had to flee home, switch off my phone (ie: put airplane mode), take procyclidine. I couldn't find the diazepam at the time so I prayed to Allah to give me the good side effects of Diazepam.

I then rested on the couch till I lightly slept off, and awoke feeling a little better.

At around 'asr time (around 4pm) I was in Masjid Furgan St. Matthews; I sat in the lecture for aqeedah with the young Mualim 'Eid for about 5 minutes, then the pre-patterns symptoms kicked in again. I left the lecture, went to the front of the masjid to rest and do Bujya.
